# Problem Statement

Many portfolios lack responsive design.

Poor navigation and unstructured layouts confuse users.

Need for a modern, responsive, and user-friendly digital portfolio.

# Project Overview

Goal: Create a personal digital portfolio.

Technologies used: HTML, CSS, JavaScript.

Clean, responsive design for all devices

# End Users

Recruiters looking for talent.

Companies seeking web developers.

Peers & professionals viewing projects.

General visitors learning about me..

# Tools and Techniques

Responsive Design (Media Queries).

Font Awesome for icons.

Contact form with validation.

# Portfolio Design and Layout

Header with profile image and navigation.

Sections: About, Skills, Hobbies, Contact.

Clean layout, soft colors, highlighted sections.

# Features and Functionality

Responsive navigation menu.

Skills & hobbies displayed clearly.

Contact form with submission alert.

Links to GitHub, LinkedIn, Email, and Phone.

# Results and Screenshot (1)

Portfolio Homepage Screenshot.

Displays profile image and navigation

# Conclusion

Built a professional and creative portfolio.

Showcases skills, hobbies, and projects.

Easy contact options for recruiters.

Future scope: Add more projects & animations.

# Thank you
